

BLOWERS

BLOWERS

- **BLOWERS** bring your inflatables to life. Each of our blowers are specifically designed to keep your inflatables filled with air and attracting attention for your brand or product.
- **BLOWERS** are sturdy and reliable. Specifically designed for indoor and outdoor use. Our blowers will last for years.

Cub

\$81.00

The "Cub" #CP-1 B-Air Blower is one of the most versatile 14HP Blowers on the market today designed to inflate ornamental advertising structures with ease and flexibility.

They are designed to be used externally as well as internally within an inflatable structure. The B-Air Cub's flexibility comes from its ability to be positioned in 3 different angles, with a built-in handle for ease of carrying or positioning.

14 HP, 2.3 Amps, 375 CFM, 6 Ft Cord, Easy to Carry Handle, Internal External Application Capabilities, 1 Year Warranty/Housing 5 Year

Grizzly

\$197.00 Standard
\$266.00 UL Approved

The B-Air GRIZZLY Blowers (#GP-1) come in a 1HP Motor with 3 speeds and 4 positions, including a swing-out kickstand! They come standard with a 2" Velcro around the outlet opening.

The Grizzlies are designed for various applications in the inflatable industry such as crawl-through inflatables, roof-top advertising inflatables, etc..., where you may require Higher CFM's and lower Static pressures.

The Grizzlies are also offered in C-UL-US Certification. Model (#GP-1-UL). This means they have been tested by and Independent Safety Certification Lab, known as Underwriters Laboratories (UL) and have found that they have passed their stringent safety tests and have become certified through the C-UL-US Safety Certification.

- Available in Black or Safety Green.

Vortex 18"

\$186.00

The Big Bear Model # BB-2 Vortex Fan is an extremely powerful fan for virtually any kind of advertising use, due to it's powerful 34 HP motor and it's uniquely designed fan blades.

The Big Bear II has a 2-Speed powerful 34 HP motor with the lowest rated decibels in its class, giving it the flexibility to be used both indoors and out! The Vortex 2 sits on a very stable "Rolling" base with 4 (lockable) wheels. The Bear 2 also has these unique built in features:

- Locking Wheels to lock unit in place during operation, and ease the task of moving unit with ease when unlocked.
- Unit includes a handle for ease of carrying unit when floor is not smooth for rolling.
- Unit has a built in cord wrap for the 25ft cord for easy storage.
- 3 built-in wind stabilizing pole receptacles for additional safety in windy conditions.
- Pre drilled 516 hole in center of fan grill to accommodate a lighting system

Vortex 24"

The Air Vortex Model AV-24 Fan is an extremely powerful 24" diameter fan used for the dancing balloons. This very high fan can work with 100ft tubes.

This one speed fan is designed for outdoor use and comes with a bolt on metal base.

Comes with 25ft cord.

\$676.00

Kodiak 1hp

\$174.00 Standard
\$197.00 UL Approved

The New 1HP Kodiak Blower (#KP-1) from B-Air is the latest in the efficiency of amps and space usage in order to obtain the highest possible static pressure and CFM.

The Kodiak creates remarkable 1170 CFM with 8.8" of static pressure at a low 7.0 amp draw which comes in real handy with today's larger and older inflatables that are being used in limited residential power supply.

In addition, the Kodiak has a reverse air louver assembly outlet a 25ft cords and stackable capabilities. The Kodiak is light at 33 lbs. and easy to carry with it's built in handle.

- 1 HP
- Powerful 1170 CFM

Kodiak 1.5hp

\$186.00 Non-UL

True to its name, the new Kodiak 1.5 HP is B-Air's latest most powerful innovation in a 1.5 HP blower Based on the proven Kodiak 1 HP the NEW #KP-1.5 is designed to produce while maintaining a low 8.8 running amp draw.

As with its predecessor the KP-1.5 is housed in a compact light weight high impact roto molded housing with the same easy to carry handle, 25ft cord and the patented safety designed "reverse air louvers" all B-Air Blowers have standard.

- 1.5 HP
- Powerful 1290 CFM
- Exclusively Designed Fan for Maximum CFM and CFM and Low Amp Draw

Folding Base

The Air Vortex Model FD-30 Fan is great for portable cold air balloons. The base system has built-in blower and light sockets for 4 lights. These work great with digitally printed tubes up to 20ft tall. On smaller balloons including Hot Air Shapes they can stand on their own for indoor installations. Base folds up and goes into included vinyl zippered case.

\$209.00

Duo Vortex

The Duo Vortex fan is great for the smaller size 2-leg dancing balloons. Dancers up to 15ft tall can be attached.

\$209.00
